## Professional Summary

My goal is to pursue a challenging career with a successful, quality conscious company. Where my skills, abilities, and the desire to excel will help my company gain the competitive edge.

## Employment history

### **Logistics Manager, Mackenzie Exhibit. SLC, UT**

Mar. 2019 – Present

- Created documents of load plans, cargo cleanliness inspections and transportation processes.
- Negotiated and arranged transport of goods with shipping or freight companies.
- Checked import and export documentation to determine cargo contents and classified goods into different tariff or fee groups.

### **Internet Technician, Meridian. South Ogden, UT**

Jun. 2018 – Mar. 2019

- Maintain and administer computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations.
- Diagnose, troubleshoot, and resolve hardware, software, or other network and system problems, and replace defective components when necessary.
- Encrypt data transmissions and erect firewalls to conceal confidential information as it is being transmitted and to keep out tainted digital transfers.

### **Purchasing, Insight Exhibits. SLC, Utah**

May. 2015 – Jun. 2018

- Implement and maintain procedures for purchasing materials and services. Work with vendors to supply materials for the production team. Work with management to keep cost down and retain quality of product.
- Coordinate with the design team to acquire items needed for booth/event.
- Acquire & maintain good-standing relation with vendors.

## Education

### **Weber State University, Ogden, UT**
